

Whitescreen.dev – A Minimalist Utility for Smarter Screen Usage

In a world filled with complicated software, **Whitescreen.dev** stands out by offering something refreshingly simple: fullscreen color displays that help you get more done. Whether you're checking for screen flaws, lighting up your space during calls, or just trying to stay focused, this browser-based tool turns your screen into a multifunctional assistant.

Spot Display Issues in Seconds

Screen calibration, dead pixel checks, or panel uniformity testing often require specialized tools. With **Whitescreen.dev**, you get instant access to a suite of solid color backgrounds, perfect for visual inspection:

- Red: <https://whitescreen.dev/red-screen>
- Green: <https://whitescreen.dev/green-screen>
- Blue: <https://whitescreen.dev/blue-screen>
- Yellow: <https://whitescreen.dev/yellow-screen>
- Orange: <https://whitescreen.dev/orange-screen>
- Purple: <https://whitescreen.dev/purple-screen>
- Pink: <https://whitescreen.dev/pink-screen>
- Black: <https://whitescreen.dev/black-screen>
- White: <https://whitescreen.dev>

Each screen fills your display entirely, helping you uncover issues that are easy to overlook.

Use Your Display as a Soft Light Source

Not enough light in your video meetings? Forget expensive lighting setups—use **Zoom Lighting** from **Whitescreen.dev** to turn your screen into a clean, diffuse light.

Use it here: <https://whitescreen.dev/zoom-lighting>

It's the perfect hack for remote workers, streamers, and digital creators.

A Smarter Way to Clean Your Display

Cleaning your screen is easier when you can clearly see where the dust and smudges are. A bright or dark background from Whitescreen.dev highlights even the smallest imperfections, so you don't miss a spot.

Create a Distraction-Free Workspace

Solid color backgrounds aren't just for testing—they also create a calmer, more intentional digital environment. Whether you're working on a big project or trying to focus during study sessions, these fullscreen colors help reduce digital noise and improve mental clarity.

Available in Multiple Languages

Whitescreen.dev is accessible globally, with support for major languages:

- French: <https://whitescreen.dev/fr>
- German: <https://whitescreen.dev/de>
- Spanish: <https://whitescreen.dev/es>
- Portuguese: <https://whitescreen.dev/pt>
- Turkish: <https://whitescreen.dev/tur>

No matter your language, the experience is simple and seamless.
